

# Rugby River Champion's Urban Outfall Safari Survey Form Printout

UNIVERSITY OF  
BIRMINGHAM

## Information on this page and form to complete overleaf

| Form section                                                                                                                                                                                                                                                                                                 | Answer categories                                                                                                                                                                                                                                                             | Outfall pollution photo gallery                                                                                                                                                                                                                                                                             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Scoring the 'flow' coming out of the outfall.                                                                                                                                                                                                                                                                | a) No flow<br>b) Trickle: <0.1l/s, enough to fill a teacup in 1 minute<br>c) Low flow: 0.1-1l/s, enough to fill a bucket in 1 minute<br>d) Moderate flow: 1-2l/s, fills more than 1 bucket in 1 minute<br>e) High flow: >2l/s, clearly fills more than a bath tub in 1 minute | Grey fungus (tufty growth on riverbed):<br><br>'Moderate flow' causing a plume of discoloured water:<br>                              |
| Scoring the 'distance' from outfall where pollution can be seen (see photo gallery for pollution types).                                                                                                                                                                                                     | a) No visible effect<br>b) Within 2m of outfall<br>c) Impact 2m to 10m from outfall<br>d) Impact 10m to 30m from outfall<br>e) Impact greater than 30m from outfall                                                                                                           | 'Moderate flow' creating scum on the surface of the river:<br><br>'Low flow' and sewage 'rag' debris (e.g., sanitary products):<br> |
| Scoring the 'aesthetics' of the outfall                                                                                                                                                                                                                                                                      | a) No odour or visible aesthetics<br>b) Faint smell, slight discolouration<br>c) Mild smell, mild discolouration, small coverage of grey fungus<br>d) Strong smell, strong discolouration, large coverage of grey fungus and/or litter<br>e) Gross smell, gross sewage        |                                                                                                                                                                                                                                                                                                             |
| Description of pollution indicators                                                                                                                                                                                                                                                                          | Text describing features such as the colour of pollutants, food waste and clogged debris.                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                             |
| <div style="text-align: center;">  Please remember to take a photo and upload to the dropbox link in the online survey form!  </div> |                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                             |
