

Rugby River Champions Project Overview

Rugby River Champions is a citizen science project led by the University of Birmingham in partnership with Rugby Borough Council. The project provides volunteers with the equipment and knowledge they need to monitor Rugby's vulnerable rivers.

We value the time of our river champions, so have picked 2 quick techniques:

1. **Urban Riverfly** – 'rivers answer to pond dipping';
2. **Water quality monitoring** – checking pollution levels.

Other techniques, like **Urban Outfall Safari** and **Invasive species spotting** are also available for interested volunteers.

What can Rugby River Champions offer you?

By becoming a Rugby River Champion, you will be offered free training, as well as free access to all of the equipment you will need in order to complete your monthly monitoring.

You will also receive ongoing support from staff, as well as a hub to upload and review your data.
